

**OUR CLIMATE CRISIS:**  
**What are the Real Causes and Why the Climate May Tip**  
Presentation by Norbert Lechner, Professor Emeritus  
Wednesday, October 9, 2019, 6:30-8:00pm  
CHAPEL HILL LIBRARY

Carbon dioxide in the atmosphere is a symptom and not the cause of the climate crisis. What is the true cause?

Immediate serious action on the climate crisis is more urgent than most people think, because the climate may tip, resulting in rapid and irreversible damage to the planet.

***Join us! ~ Presentation followed by discussion. Free! Open to all! ~***

**Wednesday, October 9, 6:30-8:00pm**

CHAPEL HILL LIBRARY

100 Library Drive, Chapel Hill, NC 27514

**Norbert Lechner, Prof. Emeritus, Architect and LEED AP is an expert in energy responsive architectural design. His books, writings, and lectures stress sustainability, and that climate change is the greatest threat to a sustainable world. He is invited all over the world to talk about climate change and what can be done to minimize its severity.**

Norbert Lechner is available for presentations; he can be reached via: [lechnnm@auburn.edu](mailto:lechnnm@auburn.edu)

Sponsored by  and the Citizens Climate Collaborative.
